

What is Patient Safety and Pharmacovigilance at Sanofi vaccines?

Sanofi's PSPV team consists of

- Hundreds of professionals, working across all of our business units, including vaccines
- Medical doctors, scientists, and pharmacists whose *sole responsibility* is patient safety

This team monitors *every* safety report in *real time*—nothing is too minor to review—and continually reassesses our vaccines' risk/benefit profile

PSPV reports all safety events and findings to regulators, like the FDA, and to VAERS and other global databases, and publishes them for healthcare professionals and the public
